13. Administrator's Report

1. Administration has been working on Landfill related items this month.
2. We met with Midwest Strategies out at our airport to discuss some of our projects, some of our challenges with our tree clearing and our crosswind one way, so we were able to get them on board and see if we can get some assistance with EGLE in some of those areas.
3. Last week we got a first draft from the architects for the Health Department

facility. They reviewed with Health Department staff. Based on feedback they will be making some revisions to make sure the location and workflow for the office works for the department. We are hoping to have some budget estimates by February.

4. The proposed park bylaw changes were presented to the Park Board last evening. Our intention is to bring those to this Board at the January committee, potentially for final action along with the park board reappointments. There are some vacancies and some seats that will expire at the end of this year. However, there has been some interest of individuals that wanted to apply, so if the Board is able to take final action on January 4, 2024 for those reappointments it would not affect any of the Park Board Meetings.
5. The OPIOID Committee met in November and during that we started a smaller subcommittee, so we are working with Region 10 to coordinate some of the suggestions that came from the Community Services Coordinating Body committee as well as the Health Department Community Mental Health improvement plan. What we are tackling right now is the lack of treatment options that are in County. Individuals seeking treatment do need to leave the County. We are looking to see if some of our dollars could be leveraged to bring some of those treatment resources in County.
